The ground-breaking tools of...

hydracial®

Handpiece and HydroPeel® Tips

The ergonomically designed, dual-functioning handpiece gives our estheticians control over your selected serum type and flow, enabling them to tailor the treatment to your specific skin type and address your individual concerns. In addition, each treatment uses a series of unique HydroPeel® Tips – each with multiple edges to gently exfoliate the skin several times during each pass, achieving better, more even results.

Vortex Technology™

The unique spiral design of the HydroPeel® Tips used in conjunction with the HydraFacial MD® proprietary vacuum technology and serums creates a vortex effect allowing our estheticians to easily dislodge and remove impurities while simultaneously introducing hydrating skin solutions with potent antioxidants. This multi-step process includes Vortex-Exfoliation™, Vortex-Peel™, Vortex-Extraction™, Vortex-Boost™, and Vortex-Fusion®.
